GAME DEVELOPMENT AND DESIGN

As a computer engineer who is focused on game development, I have mainly worked as a Unity developer. However, my interest in game design has motivated me to contribute to small projects in a designer role. This diverse experience enables me to bring a unique perspective to both the development and design aspects of game creation.

PROFESSIONAL EXPERIENCE

Eightfold Interactive **August 2025 - Current**
Unity Developer (PC)

- Working on Wavecrashers, a 3-player co-op strategy game with gameplay mechanics like Dota2 and Tower defense games.

Gleam Games **November 2024 - May 2025**
Unity Developer

- Worked on several different casual/hybrid-casual mobile games. Improving mobile optimization, and developing new features.

Freelance Game Developer / Designer **November 2023 - June 2024**

- Worked as a Game Designer and Developer in a Darkest Dungeon-inspired turn-based RPG game.
- Worked with GameDev.Guru on video contents about Unity Game Optimization

Ace Games **May 2022 - September 2023**
Unity Game Developer - Casual

- Worked on Fiona's Farm, an adventure and blast puzzle game with 100K+ daily active users

Gameflex **October 2021 - May 2022**

Unity Game Developer - Hypercasual

- Developed hypercasual game prototypes

Proud Dinosaurs **August 2021 - October 2021**
Internship - Game developer

- Completed two internships here. Hypercasual game prototypes and casual/PC game prototypes.
-

EDUCATION

Ege University (2017-2022)

Computer Engineering
3.57 GPA

Cologne University of Applied Sciences (2023)

Game Development and Research (M.A.)
Dropped out after first semester

PROJECTS AND ACTIVITIES

Global Game Jam 2024

Designed and developed a Papers Please inspired game with a team of 6 people.

Gaming Academy - Khaddit Beirut (2021)

Prepared a GDD and concept designs with four teammates for a Metroidvania PC game.
